OUR CAREER PATHWAYS ARE OFF TO A GREAT START FOR 2025!

Through this partnership, students earn dual credit with Exercise Science courses taught by adjunct faculty from the School of Health Sciences which fosters future career pathways in health and exercise science.
- The U.S. Department of Labor recently approved Indiana University as a group sponsor for a new Registered Apprenticeship Program, an innovative career pathway for aspiring K-12 educators. This program will integrate on-the-job learning with academic instruction and professional mentoring to prepare educators to serve Indiana communities and students.
- Pathways PLUS is currently in the process of developing a career and college pathway in Computer Science. Students will have the opportunity to engage in computer science college level courses and hands-on learning experiences that will prepare them for further education and careers in the growing tech industry.
- The Indiana Commission on Higher Education, the Indiana Department of Education, and other stakeholders have developed Indiana Career Coaching Framework which centers on career exploration and pathways, engagement, and experience. Indiana University Pathway Specialists will provide supports and services aligned to the Career Coaching Framework to students at partner schools.
